

**Crash,
Splash,
& Escape
Coloring &
Activity Book**

FRONT COVER

Traveling along
Chatting with your pal
All of a sudden
You're in a canal!

It's dark, cold and scary
Water's coming in fast
You are really afraid
What should I do you ask?

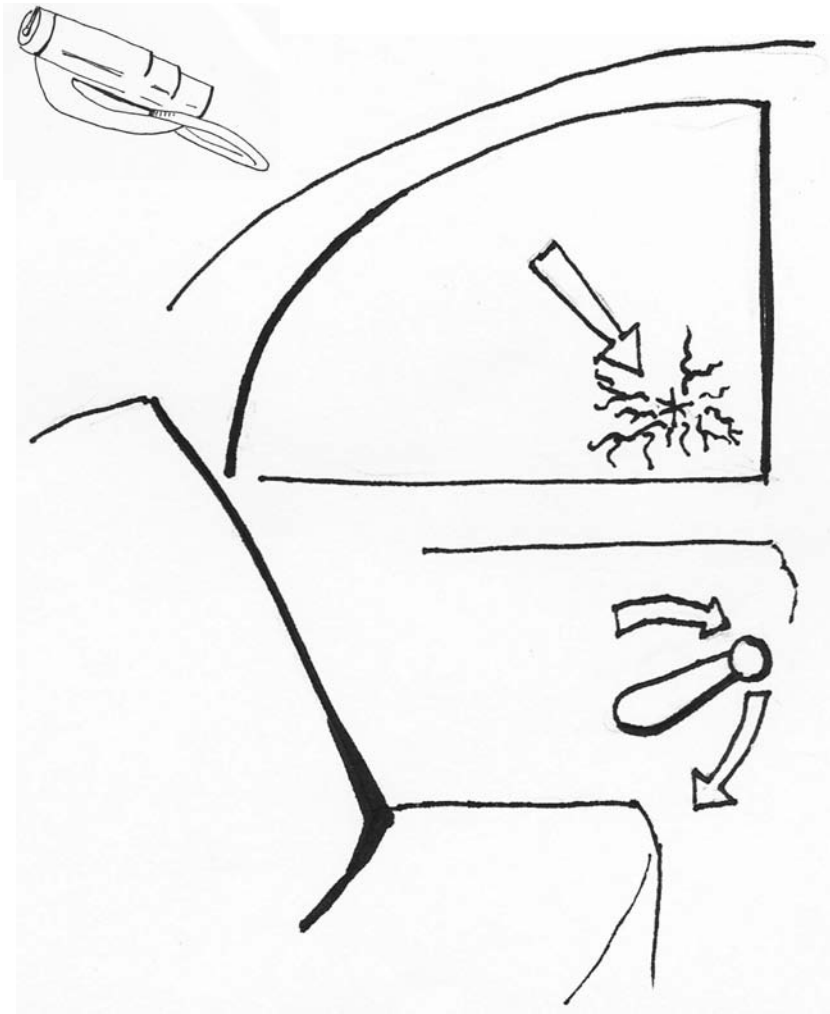

You might just get out
Using the right tools
And simply knowing
A couple of rules.....

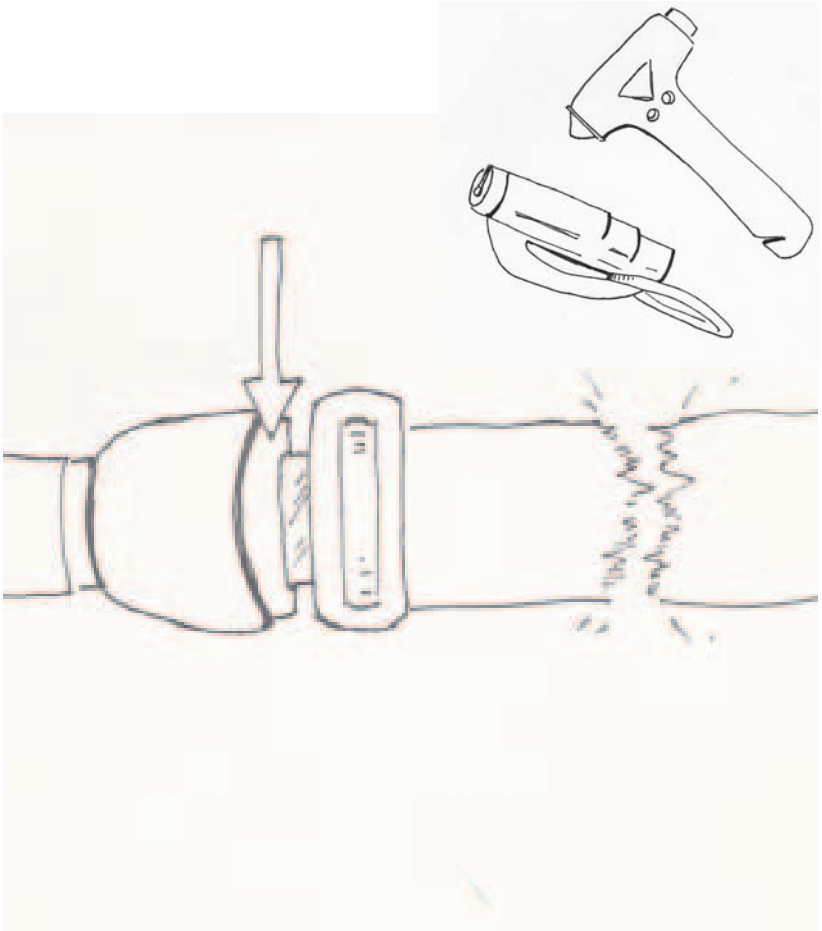

DO NOT PANIC
Be in the know
Think to yourself
S-O-S GO!

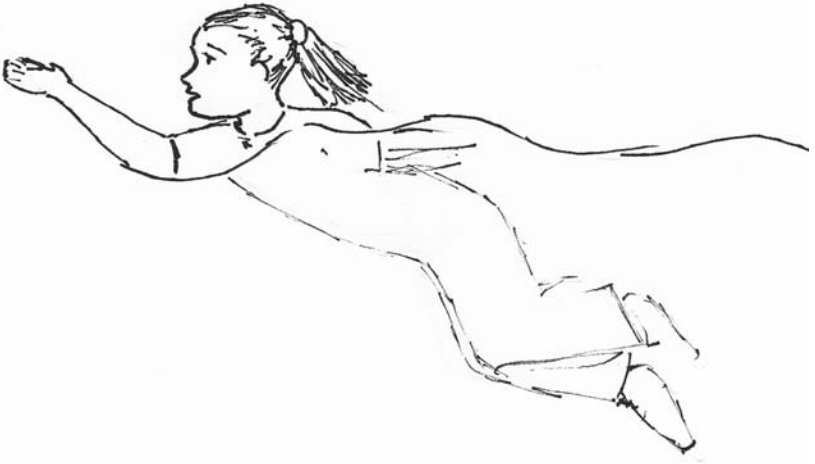

Stay calm and focused
Take a deep, deep breath
Remember...don't panic
Now here is the rest.....

Open the window
Open it wide
Window won't go down?
Break the glass from inside.

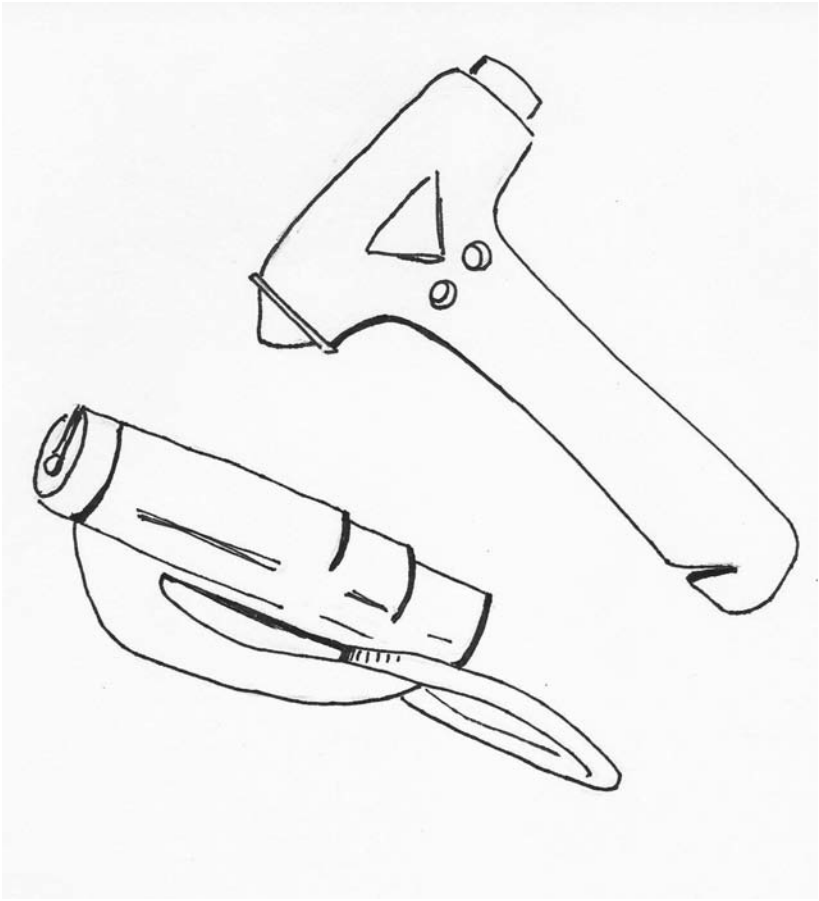

Seatbelt release
It's simple to do
Press and unhook
Or slice it in two!

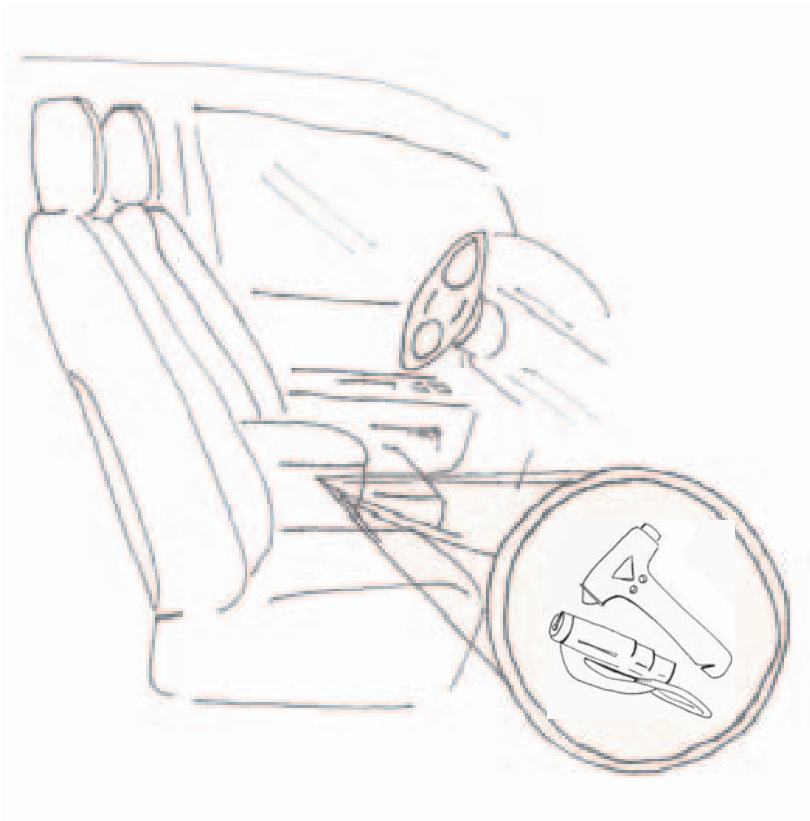

GO!!!! Get out NOW!!!
Stick to the plan
Swim to the surface
As fast as you can.

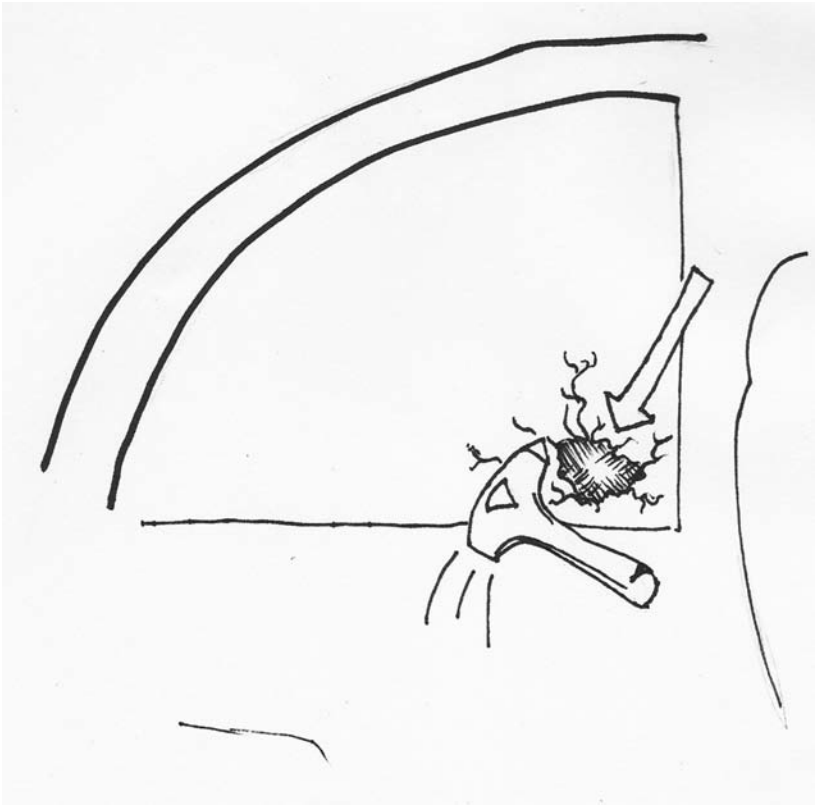

**Is it dark? Confused?
Don't depend on your luck
Start blowing bubbles
To guide your way up!!!**

Now here are the tools
You can use to escape
A life hammer or spring punch
The side windows should break...

**Within your arms reach
The tools should be stored
The console between seats
Or attached to the door.**

Punch out the corner
Of the window near you
Then out you go quickly
Just squeeze right on through.

**These tools are NOT toys
You may need them someday
When you need them fast
No time to delay...**

Will these work every time?

There's no guarantee

Better safe than sorry

Now don't you agree?
